

RFID key fob

For authorising charging processes

The RFID key fob is used to authorise charging processes in all ABL charging stations equipped with RFID readers. The chip integrated in the key fob supports the ISO/IEC 14443 Type A RFID standard and must be registered at the charging station before use. The packaging unit contains 5 individual key fobs that can be conveniently attached to a keyring via their hole opening. The delivery takes place in packaging units.

General information

Model	RFID key fob for authorising charging processes at ABL charging stations
Product number	100000253 (content quantity: 1 piece)
EAN number	4011721192390
Commodity code	85235110
Packaging unit (PU)	5 unit

Product information

Material	PVC
Chip	NXP NTAG 213
RFID standard	ISO/IEC 14443 Type A
Product dimensions (H×W×D)	45 × 30 × 1 mm
Dimensions of packaging unit (H×W×D)	140 × 65 × 30 mm
Product weight	Approx. 2 g
Weight of packaging unit	Approx. 22 g
